

AUDIOLOGISTS

 do more than you think 

Audiologists can help with...

- Hearing loss
- Sound sensitivity
- Ringing in the ears (tinnitus)
- Balance disorders
- Auditory processing disorders

Audiologists also work in research, education, advocacy, counselling, policy development and health administration to advance communication health in Canada.

Speech-Language &
Audiology Canada
Communicating care

Audiologists are *professionals with expertise in assessing and treating a broad range of hearing and balance disorders in people of all ages.*
